

Home Security Tips

Security is about layers, that is, putting several measures in place to make your home and yourself a hard target. Most home break-ins occur between 10am-2pm and are crimes of opportunity. With that, let's look at some easy tips that will help reduce that opportunity!

Easy Home Security Tips:

- Lock gates and fences
- Keep doors and windows locked
- Exterior doors should be solid - not hollow or foam core
- Put 3 ½ inch deck screws in door plates and door hinges
- Have a good deadbolt, the one that came with your home is likely weak
- Keep shrubs below 3ft tall, so they don't become a hiding spot
- Use exterior motion detectors and yard lighting
- Keep curtains closed so prying eyes cannot see what's inside
- Get "Beware of Dog" sign even if you don't have a dog
- Have an alarm system and USE IT when you leave home or go to bed
- Secure attic access from garage (most people forget this one)

Let us show you how to keep yourself and your loved ones safe both in and outside your home. Come *check us out today* and ask about a free trial self defense class!
